

Guidelines for using SHA-1 and SHA-2 Certificates

Guidelines for Haryana where currently we are using Prj-etoken utility -----

1. SHA-2 certificates are enable in the tenders which are released on or after 1st January 2012.
2. Tenders which are released on or before 31st December will only support SHA-1 Certificates and old encryption utility.
3. To use SHA-1 and SHA-2 certificates for the tenders which are released after 1st January 2012 user must install new utility named "SHA2 Mandatory Installable" from respective site.
4. Installation of new utility will affect the old utility while using SHA-2 certificates. So please remove the old utility named "NxtCrypto System 2000_Xp" and then restart PC.
5. All users have to send their certificate's public key through select certificate process after installation of SHA-2 utility.
6. Necessary pop-ups are introduced at respective places (i.e. select certificate stage, key manager activities) (user has to select "OK" to work with *old* tenders and "cancel" to work with *new* tenders.)
7. While working on new tenders with new utility please create new logins for department users.
8. Please Note : SHA-2 certificate only support windows 7 and above. To use it on Windows XP system user must install Service pack3 for XP.(if user is going to use SHA-1 Certificate on new tenders which are released after 31st Dec. then he need to install only our new utility)

Documents Required For On-line Registration On E-tendering System

Department	Category	Documents Required	Online Approval
